

# ZIP System™ Roof and ZIP System® Wall Sheathing

are named the editors' choice!

## A REVOLUTION IN ROOFING™

ZIP System Roof is a structural panel with a built-in, moisture-resistive barrier that eliminates felt paper. Simply fasten the panels to rafters or trusses, tape the seams, and you have a structural roof system and code approved underlayment all-in-one.

### ZIP System Roof includes:

- 1/2" roofing panels with Precipitek™ moisture barrier
- ZIP System™ Fastening and Tape Guides for faster, easier, more accurate installation
- ZIP System™ Tape and Tape Gun, which brings moisture resistance to seams, valleys and ridges

### What makes it revolutionary?

ZIP System installs up to 40% faster than traditional underlayments. It offers instant rough dry-in for 90 days, protecting projects from moisture. ZIP System Tape will not blow off, eliminating costly rework. Shingles and other approved roof coverings can be applied directly to the panels. The shingles lay flat for a consistent roofline. ZIP System enhances curb appeal during construction.

- Eliminates the need for felt paper and H-clips\*
- Exclusive 30-year limited panel warranty

## THE NEXT GENERATION OF WALLS™

ZIP System Wall Sheathing has a built-in, water-resistive barrier that lets you say goodbye to housewrap forever. Simply install the panels, tape the seams and you have a complete structural wall system with water-resistive barrier all-in-one.

- Stormex™ built-in barrier protects home during and after construction and eliminates the risk of trapped water between housewrap and sheathing
- Specially engineered to allow ZIP System Walls to breathe
- Barrier controls drafts, promoting energy-efficiency
- Exclusive 30-year limited panel warranty

### ZIP System Wall Sheathing includes:

- 7/16" panel with Stormex™ water-resistive barrier
- ZIP System™ Fastening and Tape Guides for horizontal and vertical installation accuracy
- ZIP System Tape and Tape Gun, which seals seams and is easier to apply than housewrap
