**SEATTLE (Nov. 14, 2008)** - Huber Engineered Woods LLC, leading manufacturer of innovative building solutions, will provide ZIP System<sup>®</sup> wall and roof sheathing products for three learning clinics at JLC LIVE Pacific Northwest 2008 held at the Washington State Convention and Trade Center in Seattle on Nov. 14 and Nov. 15, 2008. JLC LIVE brings together residential construction professionals to not only learn about the latest building products and techniques, but to see them in action. Building specialists, Mike Slogatt and Rick Arnold, will conduct the ZIP System building clinics:

- “Framing a Bay Roof” with Slogatt – Friday, Nov. 14 from 1:30 p.m. to 2:30 p.m.
- “Waterproof Windows and Doors” with Slogatt – Saturday, Nov. 15 from 1:30 p.m. to 2:30 p.m.
- “Green Framing” with Arnold – Friday, Nov. 14 and Saturday, Nov. 15 from 10:30 a.m. to 11:15 a.m.

“The Huber Engineered Woods ZIP System products provide innovative alternatives to structural panel and housewrap/felt systems that save builders time while providing superior moisture management and a tighter building envelope,” said Brent Flotkoetter, ZIP System product manager at Huber Engineered Woods. “Since the system is so different from other wall and roof products on the market, JLC LIVE is a great opportunity for residential builders to learn more about the ZIP System products through practical applications that effectively demonstrate how they can make their job faster and easier.”

ZIP System structural roof and wall panels have built-in protective moisture/water barriers and specially designed seam-sealing ZIP System tape that eliminate housewrap and felt. The ZIP System roof panels provide the code-recognized combination structural roof panel and underlayment all-in-one on which shingles and other approved roof coverings can be directly applied. Both ZIP System wall and roof panels are backed by the Huber Engineered Woods 30-year limited panel warranty and 15-year system warranty.
